

CAPABILITIES BRIEFING DOCUMENT

Verify Product & Process Verification Center

Excess inventory on hold? Impacting Production and customer deliveries? Suppliers restricting access for Source?

ON DEMAND PRECISION RECEIVING INSPECTION FACILITY

Due to the current impact of the Pandemic over the last 12+ months and the subsequent back log of products stagnating in the supply chain, along with workforce constraints impacting critical receiving inspection functions, Verify has ramped up the capability and capacity at our **Product and Process Verification Center**.

As well as our continuing FAI Management oversight we have expanded our on-demand precision receiving inspection facility in the Dallas-Fort Worth Metroplex, to help our Customers in reducing their back log of parts to production, First/Last Article validations, certification training (IPC/J-STD) and Subject Matter Expert oversight.

CAPABILITIES AND DELIVERABLES

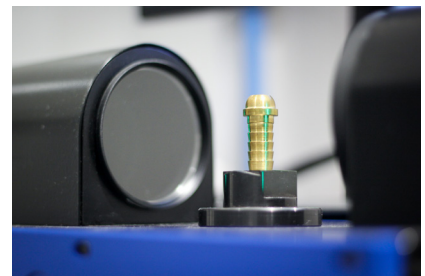

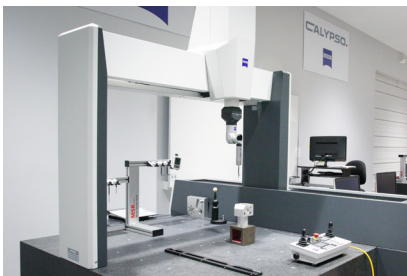

We are able to receive parts for immediate inspection. Rapidly scalable, with proven efficacy that includes:

- Standard processes designed and implemented to ensure efficiency and traceability
- Development of efficient inspection plans
- Supplier Improvement through corrective actions
- Integrated with containment and sorting actions
- Scalable based on supplier performance demands
- In-House First Article Inspection, measurements, validation, and creation
- Certification Training and testing (ISO 17025, IPC600/610/620/J-STD)

PRECISION INSPECTION CAPABILITIES

Currently our Precision Inspection capabilities include:

- CMM, Vision System, Contour Tracing (surface finish), CT (computed tomography) machine, 3D scanner, optical comparator, faro arm and microscopy
- Ability to maintain linear accuracy to .0005"
- Expertise to inspect the part(s) per AS9102 and provide rapid turnaround times
