

# SERVICE PRODUCT BRIEF

## APQP | PPAP

Verify's range of **Advanced Product Quality Planning (APQP)** and **Production Part Approval Process (PPAP)** services help customers and suppliers effectively deploy and manage APQP and PPAP in accordance with industry and AS 9145 requirements.

The objective of APQP is to support the product development process and produce an approved PPAP and product warrant that fully satisfies the customer. Qualified Verify resources are available to consult, train suppliers, plan, and conduct all APQP activities.

# APQP | PPAP

Based on customer requirements, APQP and PPAP services draw upon the following core capabilities.

Proven field resources qualified to consult, train suppliers, plan, and execute on all APQP responsibilities

Industry proven standard work packages and training programs

Online Supplier Performance Platform provides real-time status and performance analytics

Secure, supplemental workspace for PPAP product warrant reviews or recovery initiatives
