

# SERVICE PRODUCT BRIEF CONTAINMENT

Verify's range of **Containment** services mitigate the risks from undeclared nonconforming or failed products entering the value stream. We help our customers prevent a manageable problem from becoming a full-blown crisis.

Under the authority and planning of the Verify Containment Manager, our services immediately facilitate supplier cooperation and build a containment wall. Our rapidly deployed team expeditiously sorts and quarantines product and facilitates rework, repair, return, and replace. We keep our customer apprised of progress at every stage through final resolution.

# CONTAINMENT

Based on customer requirements, Containment services draw upon the following core capabilities.

	<b>People</b>	Experienced containment managers and qualified teams rapidly deployed to plan, execute, and report on all containment activities
	<b>Process</b>	Industry proven standard work packages including best practice processes, checklists, and forms
	<b>Platform</b>	Online Supplier Performance Platform provides real-time containment status, results, and performance analytics
	<b>Facilities</b>	Establishing and managing appropriately located facilities, equipment and tooling to effectively complete project requirements

## Best Practice Containment Steps

- Assign responsibilities and establish plans
- Facilitate supplier cooperation and build necessary containment infrastructure
- Identify and hold suspect product
- Deploy containment wall
- Sort and quarantine – facilitate rework, scrap, return, and replace
- Assure adequacy and effectiveness of corrective actions
- Final resolution and project closure

## Verify Delivers

Best practice containment services based on specific customer requirements

Containment managers and rapidly deployed teams

Necessary infrastructure to complete all responsibilities

Real time visibility, traceability, and performance metrics

## Customer Benefits

Effective containment of quality issues

Rapidly resolved quality issues

Driving supplier recovery and improvement to prevent recurrence

Cost of nonconformance passed back to the supplier

## Value Proposition

Global, scalable, and insightful solutions to recover, improve, and maintain optimum supply-chain performance.
