

SERVICE PRODUCT BRIEF RISK ASSESSMENTS & ANALYSIS

Verify's **Risk Assessment** services identify and assess the likelihood and severity of potential threats and risk factors that may affect compliance, quality and delivery performance -- in a systematic, proactive, comprehensive and cost effective manner.

From single assessments to fully managed programs, Verify's qualified risk assessment specialists plan, measure, and report based on customer requirements or implementation of best practice. The assessments and subsequent analysis are used as the basis to reduce, mitigate, accept, manage, and control risk.

RISK ASSESSMENTS

Based on customer requirements, services draw upon the following core capabilities:

Experienced and proven field resources qualified to plan, execute, report, and follow-up on all assessment responsibilities.

Industry proven standard work packages including checklists and forms.

Online Supplier Performance Platform provides real-time status and performance analytics.

Best Practice Risk Maturity Model

1. Immature

- Organization has minimal or no awareness and understanding of risk management. No process in place

2. Basic

- Risk management applied inconsistently with limited standardization. Some formal processes in place

3. Emerging

- A risk management framework exists with defined and documented principles. Not all processes fully implemented

4. Mature

- The organization is proactive in risk management. Processes are fully implemented and reviewed for continuous improvement. Key risk indicators in use

5. Advanced

- Risk management is considered a value driver and proactively used for day to day decision making. Predictive risk analytics are proactively used to identify and monitor risk
